Hardware for windows and balcony-doors must do so much more than just function correctly. Only those who also actively acknowledge the importance of aesthetic design, ease of installation and efficient warehouse storage can really deliver an efficient solution. This is why window manufacturers rely on the Gretsch-Unitas group: as one of the leading international providers of window and door technology as well as automatic entrance door and building management systems, we are also the competent partner for Tilt&Turn hardware. The basis is the 100-year history of our family-owned company which has always been intrinsically linked with technical progress, reliability and efficiency. With our Tilt&Turn hardware range we provide an aesthetically attractive, universally applicable, complete solution. In order to live up to our guiding principle "Securing technology for you", we combine first-class products with first-class services which we would like to present in this brochure.
Side-Hung, Inline-Sliding, Top-Hung, Tilt-Only, Vertical-Pivot or Slide&Fold windows. Single or multi-sashed in different shapes. Made of PVC, timber and aluminium. The GU Group provides all options to window fabricators all over the world and also makes their job equally straightforward: by supplying high-quality hardware systems that not only satisfy high technical and aesthetic demands, but also increase fabrication, installation and storage efficiency.
For universal use: the UNI-JET central locking system
One solution for all window types and materials. Special central locking systems are only required for the Lift&Slide systems and with ALU-JET AK 8.
Well thought out down to the last detail: the UNI-JET central locking system

From automatic cams through to anti-slam devices

Ingenious technical solutions that can be combined to form an intelligent system: all components of the central locking system are precisely coordinated and have been developed with the aim of simplifying manufacturing, installation and operation.

Cleverle
The Cleverle automatic cam compensates for clearances of between 8.5 and 15 mm in conjunction with the standard striker, simplifying installation and maintenance.

Clip connection
The drive-gear and stay-guide’s connection is implemented both safely and practically, thanks to the clip-in function.

Linear, automated-machinery compatible connection
Build windows cost-effectively: the linear connection simplifies automated-machinery fabrication.

Straight(forward) cropping
Easily crop drive-gears and stay-guides to the required length – no special staggered punching machinery required: also ideally suited for subsequent cutting on site.

Fixed handle height drive-gear
Ideal for modular connections: the fixed handle height drive-gear can be cropped by 160 mm to accommodate other hardware components.
Sash lifter
The sash lifter gently lifts the sash into the locked position. The sash lifter gently lifts the sash into the closed position, supporting user-friendly operation and preventing mishandling.

Logo clip
The logo clip is suitable for the application of CE and RC2 markings or fabricator logos and addresses.

Magnetic contact
Various components incorporating magnets are available for opening & locking monitoring up to VdS grade C.

Standard ferGUard*silver surface sealing
Enduring high-quality aesthetics: ferGUard*silver is highly resistant to corrosion as verified by the results of standardised salt spray tests.

faceGUard – surface treatment for the highest demands
The surface treatment for protection against aggressive climatic conditions, e.g. in coastal regions. Meets the requirements of the stringent salt spray test for up to 1500 hours.

Flat packaging
UNI-JET is supplied in ergonomic flat packaging which makes installation easier and saves warehouse space.
The face-fixed UNI-JET hinge-sides
The face-fixed UNI-JET D, UNI-JET M, UNI-JET S and UNI-JET C hinge-sides

Aesthetics and slimline features in window design are becoming more and more important. The technical demands are also increasing: the emergence of trends such as triple glazing and floor-to-ceiling windows mean that greater sash weights are required. With UNI-JET, the GU Group provides a range of hinge-sides that satisfies these design and technology expectations – irrespective of whether for PVC, timber or aluminium windows.

Tried-and-tested technology with an appealing look
The UNI-JET hinge-side is convincing due to its cohesive elegant design which blends harmoniously with modern window frames: the high-quality surface in white paint or silver aesthetics has no visible screws or pins, which means cover caps are no longer required. Additional colours are available on request or choose from the wide range of cover caps available.

The lasting effective solution
The UNI-JET can carry sash weights up to 200 kg and floor-to-ceiling sashes up to a height of 2800 mm – without requiring any additional components and with identical visual appearance. Ease of movement when opening and closing is also ensured up to the safety class RC3. The hardware functions are guaranteed for 10 years, ensuring their long term reliability.

Easy handling in production
The entire UNI-JET hardware range is designed for easy, efficient and machine-compatible fabrication. Symmetrical components, hole and screw patterns make hardware installation easy. Flat packagings and a reduced number of components save warehouse space.

The concealed UNI-JET hinge-sides
The concealed UNI-JET SCF and UNI-JET CC hinge-sides

The GU Group provides a wide range of concealed hinge-sides for PVC, timber and aluminium windows in order to meet high design expectations and extend the scope of window design and manufacturing freedom. The fully concealed hinges make the window profiles a visual highlight.

No compromises on design and functionality
The UNI-JET SCF hinge-side for PVC and timber windows (with/without overlap or with CONTURA-compatible profile) and the UNI-JET CC hinge-side for aluminium windows emphasise clear architectural lines and offer the same degree of safety and functionality as the face-fixed hinge-sides from the GU Group.

The invisible load carrier
Sash weights up to 160 kg, floor-to-ceiling sashes up to 2800 mm and ease of operation, also in safety classes up to RC2 – the concealed hinge-sides have been found to perfectly satisfy all of the above when subjected to 15,000 test cycles. The option of a barrier-free version provides an additional benefit.

More installation efficiency
With concealed hinge-sides, the sashes are hinged parallel to the frame. This allows for one-man installation. Space-saving packaging and a reduced number of components also reduce storage overheads.

The UNI-JET Tilt&Turn hardware range

The full product range.

PVC, timber or aluminium; face-fixed or concealed hinge-side: each window places specific demands on the hardware. The UNI-JET Tilt&Turn hardware range thankfully offers the right solution for all windows and balcony-doors – aesthetically pleasing, high-quality and easy to manufacture.
Drilling jig for pivot-rest and stay-bearing
Perfect positioning of each hinge-side: the symmetrical solid drilling template makes installation easier and prevents installation errors.

Drilling-jig for drill-in hinge
The solid drilling jig with funnel-shaped drill bushings of hardened steel allows the sash to be pre-drilled efficiently and precisely.
The face-fixed hardware system for PVC

UNI-JET D

The UNI-JET D hinge-side is available for PVC windows and balcony-doors either with a rebate corner-hinge or drill-in hinge. The strikers are perfectly adapted to the particular profile system and ensure the window elements work reliably.

Design benefits

- Cohesive elegant design
- High-quality surface available from stock in white and silver, additional colours available on request
- Cover caps available in a large selection of colours

Easy handling

- Assembly-friendly pin safeguard in the stay-bearing
- Convenient, three-dimensional hardware adjustment
- Easy adjustment without having to remove anything: flexible cap on the bottom drill-in hinge or rebate corner-hinge
- Stay bearing pin can be conveniently removed using the GU pull-handle or the GU adjustment tool, or a standard slotted screwdriver

Possible applications

- Load-bearing capacity of hardware tested up to 150 kg
- Barrier-free version with higher positioned rebate corner-hinges for balcony and patio doors with threshold

The concealed hardware system for PVC

UNI-JET SCF

The PVC hardware for windows and balcony-doors with fully concealed pivot-rests and stay-arms satisfies the most stringent demands in terms of design, user friendliness and ease of installation.

Design benefits
- The new inward-moving turning-curve allows for greater design freedom
- No visible hardware components – also suitable for use in flush windows

Easy handling
- No window drilling required
- One-man installation possible thanks to the parallel sash hinging
- No damage to components when plastering, as they are situated in the rebate area

Possible applications
- Also with triple sashed “Swiss windows”
- Hardware load-bearing capacity tested up to 130 kg, with load-absorption set up to 160 kg
- Opening angle up to 90°
- Tested resistance classes

The face-fixed hardware systems for timber

UNI-JET M and UNI-JET S

For timber windows and balcony-doors, UNI-JET M and UNI-JET S offer a wide range of hinge-side versions from 1 x Ø34mm and 2 x Ø34mm drill-hole through to the screw-on type pivot-rest and stay bearings.

**Design benefits**
- Cohesive elegant design
- High-quality surface available from stock in white and silver, additional colours available on request
- Cover caps available in a large selection of colours

**Possible applications**
- Sash rebate up to 1700 mm wide and 2800 mm high
- Maximum hardware load-bearing capacity is 200 kg due to solid rebate corner-hinges for heavy weights with identical aesthetics as with the standard hinge-side version
- Barrier-free version with higher positioned rebate corner-hinges for balcony and patio doors with threshold
- All versions are also available as Tilt-First system
- Rebate corner-hinges available with or without turn-brake (turn restriction)

**Easy handling**
- Assembly-friendly pin safeguard in the stay-bearing
- Convenient three-dimensional hardware adjustment
- Easy adjustment without having to remove anything: flexible cap on the bottom rebate corner-hinge
- Stay bearing pin can be conveniently removed using the GU pull-handle or the GU adjustment tool, or a standard slotted screwdriver

The concealed hardware system for timber

UNI-JET SCF

No compromising on window design and function: with its fully concealed pivot-rests and stay-arms, the new UNI-JET SCF hardware lives up to the highest demands. The hardware is universally usable for timber windows with sash overlap, with CONTURA-compatible profile, and for flush timber windows.

Design benefits

■ The new turning-curve provides 5 mm free space on the frame, thus allowing for more design freedom
■ No hardware components visible

Easy handling

■ No milling work necessary on the window
■ One-man installation possible thanks to the parallel sash hinging
■ No damage to components when plastering, as they are situated in the rebate area

Possible applications

■ Also with triple sashed “Swiss windows”
■ Hardware load-bearing capacity tested up to 130 kg, with load-absorption set up to 160 kg
■ Opening angle up to 90°

The face-fixed hardware systems for aluminium

UNI-JET C

With UNI-JET C for aluminium windows with 16 mm sash hardware groove, the GU Group makes it possible to create a harmonious overall image of both the hardware system and window. The hardware components are clamped to the frame.

Design benefits

■ Coherent aesthetically appealing design using an aluminium profile hinge flush with the sash overlap
■ High-quality surface finish in anodised silver, white or black available from stock, an uncoated version is also available for project-related coating

Easy handling

■ Fabricator-friendly clamp fastening of the sash corner-hinge in the rear-cut hardware groove
■ Convenient three-dimensional hardware adjustment

Possible applications

■ Sash rebate up to 1600 mm wide and 2800 mm high
■ Hardware load-bearing capacity tested up to 130 kg

UNI-JET D

The unpretentious elegance of the UNI-JET D hinge-side makes it an ideal match for the slimline profile design of aluminium windows. As it can also be used equally effectively for PVC windows, this significantly reduces storage overheads.

Design benefits

■ Cohesive elegant design
■ High-quality surface available from stock in white and silver, additional colours available on request
■ Cover caps available in a large selection of colours

Easy handling

■ Assembly-friendly pin safeguard in the stay-bearing
■ Convenient three-dimensional hardware adjustment
■ Stay bearing pin can be conveniently removed using the GU pull-handle or the GU adjustment tool, or a standard slotted screwdriver

Possible applications

■ A barrier-free version is available with higher positioned corner-hinges for balcony and patio doors with threshold
■ Sash opening angle up to 180°

The concealed hardware system for aluminium

UNI-JET CC

The UNI-JET CC hinge-side ensures a refined overall appearance of aluminium windows. The fully clampable hardware system with fully concealed pivot-rests and stay-arms is the right choice for aluminium windows with 16 mm sash hardware groove.

Design benefits

- No hardware components visible

Easy handling

- No machining necessary on the frame profile
- Installation without any drilling: modular, fully clampable hinge-side
- One-man installation possible thanks to the parallel sash hinging
- Suitable for flat or rear-cut 16 mm sash grooves
- Convenient three-dimensional hardware adjustment

Possible applications

- Hardware load-bearing capacity tested up to 130 kg
- Opening angle up to 100°

The face-fixed hardware system ALU-JET AK 8
The ALU-JET AK 8 central locking system

The operation of the ALU-JET AK 8 central locking system is based on connecting rods and all components are compatible with the 15/20 aluminium sash Euro-groove.
ALU-JET AK 8

The aluminium window hardware with clamping installation technology for high-quality windows in commercial construction projects: all ALU-JET AK 8 face-fixed hinge components are made of anodised or powder-coated aluminium.

**Design benefits**

- High-quality surface finish in anodised silver, white or black available from stock, an uncoated version is also available for project-related coating
- Identical aesthetics of pivot-rest and stay-hinge, flush with sash overlap

**Easy handling**

- No machining necessary on the frame profile
- All components are compatible with the aluminium 15/20 sash Euro-groove and the 10/14, 12/15 or 14/18 frame groove
- The logical connecting-rod coupling system simplifies production steps during hardware installation
- The connecting-rod geometry is perfectly adapted to the 15/20 sash hardware-groove
- Convenient three-dimensional hardware adjustment
- Convenient operation thanks to the tried-and-tested SPACIO and ADAGIO-A geared-handles. Alternatively: insertable drive-gear & standard 7 mm spindle handles

**Possible applications**

- Hardware load-bearing capacity tested up to 130 kg

Systematic Service

ConfìGUrator

The right products in the right quantity: the practical confìGUrator is an online platform where part lists and hardware sets can be precisely determined. The right products in the right quantity: the practical confìGUrator is an online platform where part lists and hardware sets can be precisely determined. The data is determined based on current conditions and fundamental technical principles.

Hardware data service

Individual, accurate and comprehensive: GU’s hardware data service generates hardware master data as defined in our catalogues or according to the fabricator’s individual requirements. As a result, the customer has access to project-specific hardware data with commercial and technical details.

Tender-Text-Manager

Comprehensive, reliable and technically up-to-date: with the Tender-Text-Manager, the GU Group provides its customers with a convenient and effective online tool that allows them to effortlessly compile technical specifications and complete tender text specifications – for all of GU’s products.

Customer Information System

Available at the click of a mouse: the Customer Information System (CIS) is an ordering and information system for all of GU’s products. Customers can use the online platform 24/7 to access important information: from preparing a quotation all the way through to carrying out an availability check in real time, and from placing an order through to tracking it down.
A product on its own is not a solution. The correct level of security, function and cost effectiveness can only be achieved with the right planning and by ensuring correct application. The GU Group therefore also applies the systematic thought processes demonstrated in its product range to its service offering. Close interlinking of one-to-one expert advice, free online support and a comprehensive programme of technical seminars aims to make the day-to-day work of customers easier.

Order by Scanning (ObS)

The ordering system for streamlined logistics: Order by Scanning (ObS) is an easy-to-use scanner ordering system for recording requirements in production, warehouse and administration. The data is scanned via special barcode labels and transmitted to the GU Group directly online. The corresponding order number is displayed immediately and the status can be conveniently tracked online.

Logistics

Saves space and time: with the flat and ergonomically-optimised UNI-JET Tilt&Turn hardware packaging, the GU Group ensures efficient storage and easy removal of components at the workplace. This makes day-to-day work processes faster and more efficient.

Seminars and training courses

Practical knowledge based on first-hand experience: With around 160 events annually, the GU Group offers an extremely wide range of seminars and training courses. The programme includes product innovations and their applications, current architectural trends and standards and directives. Several seminars and training courses are certified and recognised as advanced training courses by the chamber of architects and civil engineers in Germany.

Licences and CE

Maximum security as standard: The GU Group is a CE licenser for windows and balcony-doors and can undertake the CE certification on your behalf thus saving you time and effort in your day-to-day business.
